

## How's Your Internet Connection?

The Town of West Point's Broadband Committee wants broadband access for every town resident. And not just while sitting in your parent's car outside the Town Hall doing homework on a winter's night. To help us understand where to concentrate our efforts, please consider for following questions:

1.) Do you have broadband?

If not, tell us your address. Send via mail to Town of West Point, N2114 Rausch Rd, Lodi WI 53555 or email your address to **townchair@townofwestpoint.us**.

2.) If you have broadband, do you know your speed?

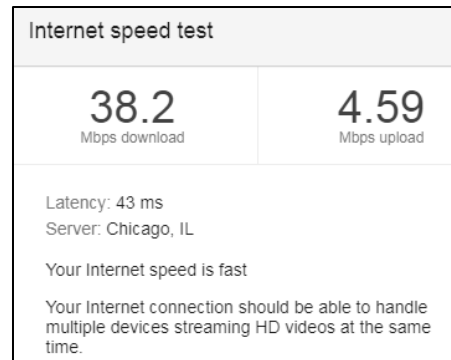

If not, please run this test

<https://www.measurementlab.net/tests/ndt/>

Email your test results to

**townchair@townofwestpoint.us**.

This test gives a result that should look like the image to the right. We hope with higher numbers!

Frontier Communications is considering increasing their broadband footprint in West Point giving us more access possibly by the summer of 2018. Is there anything you'd like to say to help encourage this expansion?

About 100 years ago the nation's electrical grid expanded by forming Rural Electric Cooperatives. If development of a Rural West Point Broadband Cooperative interests you, let us know!

---

## West Point Historical Society

If you are going through old family photos please consider sharing your West Point family history with the West Point Area Historical Society. We are always looking for information about our local area families, farms and businesses. Some photos may not be familiar to you, but the society may be able to identify them if they are in our collection. We can scan the photos and then return them to you. Please email the society at **historical@townofwestpoint.us** with questions.
